CORE STACK

Linux & Infra
Ubuntu · RHEL · Raspbian · Orange Pi OS · Bash · SSH · systemd · Nginx · DDNS / self-hosting

Docker
Images & containers · Dockerfile · Docker Compose · networks/volumes · multi-service stacks · dev and production environments

Cloud / DevOps
Nginx (reverse proxy, statics) · Jenkins · CI/CD · Containers · Web deployment

Software
JS/TS · Node.js · React · Vue · Angular · Express · Python · Flask · Java / Spring Boot

Networks & Telecom
TCP/IP · HTTP/REST · Sockets · JSON · Serial · IoT / IIoT · Hardware monitoring

Embedded
ESP32 · Arduino · Raspberry Pi · C++ / PlatformIO · Allen-Bradley PLC · Siemens S7

Target: Junior Cloud (K8s/OpenStack/Telecom) · Linux Admin · Jr. Software Engineer

Mechatronic engineer with hands-on fullstack development, Linux environment administration, and self-hosted service deployment (Nginx, Docker, DDNS). I combine JS/TS, Python, Bash, containers, and networking/telecom (TCP/IP, HTTP, sockets) for **Junior Cloud**, **Linux Administrator**, and **Jr. Software Engineer** roles.

FIT FOR TARGET ROLES

Junior Cloud (K8s / OpenStack / Telecom): Linux, Docker (Compose, networks, volumes), Nginx, TCP/IP and telecom/IoT; self-hosted services ready for orchestration.
Linux Administrator (dev environments): Ubuntu/RHEL, Bash, Nginx, Docker, Jenkins, host setup, and remote production web deployment.
Jr. Software Engineer: fullstack (JS/TS, React, Node, Python), REST APIs, and end-to-end product delivery.

EXPERIENCE

Systems Technician / Developer
Robert Bosch · Aug 2024 — Aug 2025

- Built and deployed web apps in industrial production environments.
- Dev environments with Docker (Compose, networks, volumes) and continuous delivery (Jenkins).
- Software and connectivity solutions with cross-functional teams.

Application Developer Technician
Fletes México · Jun 2022 — Dec 2023

- Multiplatform web apps for logistics operations.
- Legacy migration to modern web architecture (APIs, frontend, backend).
- Linux automation and scripting for support and deployment.

EDUCATION

Mechatronics Engineering · 2018 — 2022
TecNM — Cd. Juárez Campus — Electronics, mechanics, control, and programming.

Electronics Technician · 2015 — 2018
CBTis No. 128 — Foundations in electronics and systems.

FEATURED PROJECTS

Self-hosted Linux · Nginx · Docker · Fullstack web · DDNS

Levantado Event List
https://levantado.ddns.net/levantado-event-list
Self-hosted Linux web app (DDNS + Nginx): 1,194 events, auth, filters, map, and interactive UI — host admin, reverse proxy, remote exposure.

Linux | Nginx | Docker | Web | DDNS

Levantado Beats
https://levantado.ddns.net/levantado-beats
Audio/MIDI library on Linux/Nginx: search, metadata, CID references, and file delivery.

Linux | Nginx | Media | Ops

Tire System — Web Migration
https://josereza.github.io/projects/sistema-llantas/
MS-DOS to modern web architecture migration (backend, frontend, APIs).

Fullstack | Migration | APIs

IoT Welder + IIoT Research
https://josereza.github.io/projects/conectividad-maquina-soldadora/
IoT spot-welder connectivity (web control, M2M) plus industrial IIoT research.

IoT | Telecom | IIoT | Web

PROJECT PRESENTATIONS

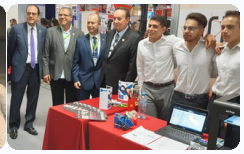

Innovation expos and hubs (NCIE / Technology HUB): computer-vision demos, 3D prototyping, PLC NODE (hardware + web/cloud), and industry engagement.

NCIE — computer vision, dashboards & 3D prototyping

PLC NODE — industrial control with web/cloud UI

Technology HUB — collaboration & tech networking

Industry expo — prototypes, logistics & innovation
